INSTALLATION OPTIONS

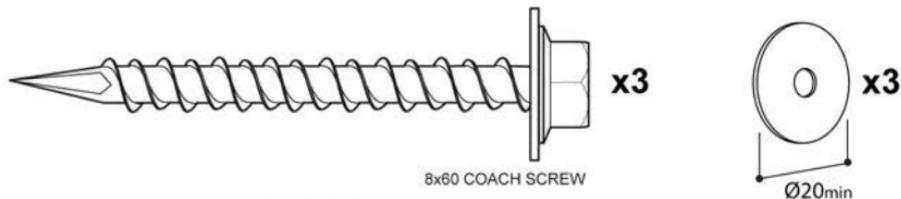

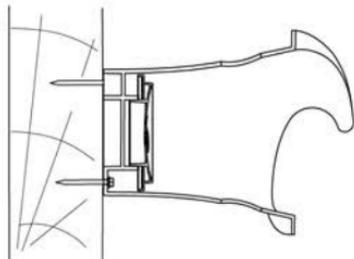

M6x70\* LOOSE BOLT SHIELD ANCHOR

\* NOTE: If your walls have a very thick layer of plaster or render use a longer fixing to ensure the anchor is in the brick.

M6x60 METAL HOLLOW WALL FIXING

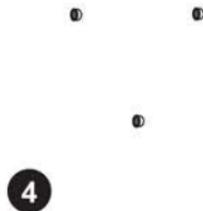

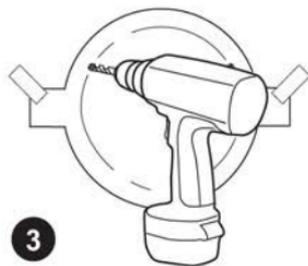

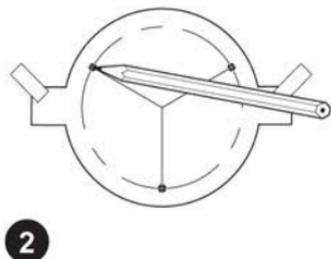

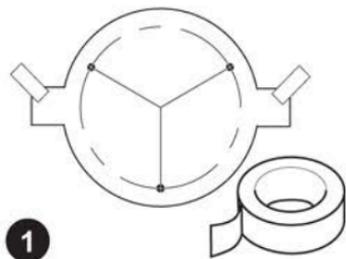

\*NOTE: when the Cycloc is mounted on a hollow wall, the structure must be capable of taking the additional load. Ideally at least one hole should be into a 'timber stud' - with a suitable size of wood screw.

8x60 COACH SCREW

Scale 1:1
